

## **DISC RIDGER FOR POTATOES - DR**

**CHARACTERISTICS**

1. This Erdvark 3 Point Disc Ridger for Potatoes is a multipurpose implement that can be used to make a single ridge or can be set wider to form a ridge for the new twin-row potato planters and lifters.
2. The Disc Ridger can also be used to form ridges for other vegetables that are normally produced on ridges.
3. This Ridger can easily be set narrower or wider by undoing 8 bolts a little, shift the shank to required position and lock it again.
4. The Disc angle has multiple holes on the beam bracket and the disc angle can quickly be altered.
5. Strong and special beam profile to mount the shanks.
6. Longer than normal 3-point hitch brackets to accommodate standard CAT II as well as high narrow wheel tractors.
7. The disc hub is from the proven FSP disc plough which is maintenance free and fitted with the special Duo-cone seals.
8. The disc angle can be set on the upper beam bracket with multiple holes to suite your ridge specifications.
9. The standard plough discs are 710mm (28") x 8mm to give you that advantage to build a ridge with a single pass.
10. This Ridger is fitted with a light rear scraper to level out the ridge.
11. The Ridger is fitted with two stands for easy hitching.
12. The Ridger is fitted with CAT I/II hitch pin combination.
13. Erdvark Disc hubs requires no service or lubrication, it is lubricated with a special lubricant at the factory and seals.
14. 100% Guarantee that no dust and sand can enter the disc hub under normal working conditions due to the Floating Duo-cone Seals.
